📦 Invock – Smart Inventory Management

🚀 About Invock

Invock is a next-generation business automation platform that helps companies **streamline sales, operations, and customer interactions** using AI-powered chatbots and workflow automation.

🛠️ Inventory Management Capabilities

1. Real-Time Stock Tracking

- Monitor stock levels across multiple locations.

- Get instant alerts for low stock or overstocking.

2. Automated Order Management

- Track purchase orders and sales orders in one place.

- Reduce manual effort and prevent errors in stock movement.

3. Smart Forecasting

- AI-driven demand prediction to avoid stock-outs.

- Seasonal and trend-based insights for better planning.

4. Multi-Channel Integration

- Sync inventory with **WhatsApp chatbot**, online store, and accounting system.

- Ensure every sale is automatically updated in stock records.

5. Reports & Analytics

- Daily/weekly/monthly reports on stock usage.

- Identify slow-moving or fast-moving items.

💡 Why Businesses Choose Invock?

✔️ Reduce stock leakages & manual errors
✔️ Improve order fulfillment speed
✔️ Get real-time visibility into inventory health
✔️ Connect seamlessly with **sales, accounting & customer support**
